John (maintenance district director) – front playground main structure put up in 2000 (25 year life span, 7 year lifespan still, they will fix the playground), surrounding pieces all have to remove in phases, back playground (district will tear it down in the summer of 2018)

The back playground will be the first priority to replace. We have flexibility around the layout and the district will work on the surrounding space.

There were 3 playground options presented. Those attended gave feedback.

For the front playground – will start with surrounding phases and then the main play structure. District provides the maintenance etc.
